

# SPRING FIELD TRIP PROGRAMS 2025

## YOUNGER STUDENTS:

Our field trips for younger learners are the perfect way bring hands-on, outdoor experiences to your students. Dig into our gardens, learn about our livestock, and explore the farm's forests, fields, and shoreline.

## OLDER STUDENTS:

Our field trips for older students center around regenerative farming, local ecosystems and hands on learning. With our diverse, on farm curriculum, our team can help design an experiential field trip to meet your classes focus and interest.

**APPLY NOW!**
